Backend-focused Computer Science undergraduate with hands-on experience building and deploying full-stack AI-powered applications using FastAPI, Python, and LLM integrations. Actively developing production systems across legal-tech, healthcare, and safety domains, with a growing focus on AI engineering.

EDUCATION

Pranveer Singh Institute of Technology (PSIT), Kanpur, India **2024 – 2028**
Bachelor of Technology (B.Tech) in Computer Science and Engineering

Class XII **85% | 2023**

Class X **87% | 2021**

EXPERIENCE

FlyRank – Back-End AI Engineering Intern **Jul 2026 – Present**

FastAPI, Python, AI Integrations

- Working as a Back-End AI Engineering Intern on a 6-week engagement, building backend services and AI integrations using FastAPI.

PROJECTS

Nyaya AI – AI-Powered Legal Aid Platform **2024 – Present**

FastAPI, Python, Groq API (llama-3.3-70b), Supabase, React.js, Tailwind CSS

- Built a full-stack AI legal assistant for Indian citizens with bilingual support (English & Hindi) and persistent query history.
- Integrated Groq's llama-3.3-70b LLM via FastAPI to deliver real-time, context-aware legal guidance tailored to Indian law.
- Implemented Supabase Auth (Email + Google OAuth) with PostgreSQL for secure user management and query storage.

FRACTOES – AI-Powered Fracture X-Ray Analysis Platform **2025 – Present**

FastAPI, Python, SQLAlchemy, Supabase (PostgreSQL & Storage), Grok API, ReportLab

- Sole backend developer on a 5-person team building an AI-assisted fracture detection and radiology reporting web app.
- Designed and deployed the FastAPI backend (Render) with JWT auth, OTP-based email verification, and secure Supabase-backed data storage.
- Integrated a fracture detection model with Grok API-generated radiology reports and automated PDF report generation via ReportLab.

Smart Helmet – IoT Safety System **2024**

ESP32, Python, JavaScript, GPS Module, MQ-3 Sensor

- Engineered a dual-vehicle safety system that prevents ignition unless the helmet is worn, with alcohol detection via MQ-3 sensor.
- Integrated SOS emergency button, real-time GPS tracking, and a live web dashboard for location monitoring.

Echoing Dimensions – Emotion-Reactive Chatbot **2023**

HTML, CSS, JavaScript, Python

- Built a chatbot web app that reads the user's emotional tone via keyword patterns and dynamically shifts its UI atmosphere in real time.

ONGOING / EXPLORATORY WORK

- TruthLens – AI-Powered Deepfake Detection Backend (FastAPI, Redis, PostgreSQL): backend lead building a scalable deepfake-detection analysis pipeline.
- Astra – Offline AI Companion for Astronaut Well-Being, SIH 2026 candidate (FastAPI): backend/system architecture lead, building APIs, database, offline alert queue, sync engine, and auth for a 6-person team's submission based on ISRO's MAITRI problem statement.
- Holographic Interface Control (HIC) (Python, OpenCV, ESP32, MPU6050): building a gesture-controlled holographic image manipulation system.

ACHIEVEMENTS & CERTIFICATIONS

- Awarded 5 Microsoft Learn Certifications (2026) covering core AI, Generative AI, Azure AI solutions, AI Agent development, and model deployment via Microsoft Foundry Portal.
- Completed Walmart Global Tech "Advanced Software Engineering Job Simulation" via Forage (August 2026) – covering Advanced Data Structures, Software Architecture, Relational Database Design, and Data Munging.
- Certified in Data Analysis with Python by IBM via Coursera.
- Completed Anthropic Academy certifications in Claude 101 and AI Fluency for Students (2026).
- Achieved REST API (Intermediate) certification on HackerRank.
- Finalist at the BBD Hackathon.
- Active member of Code Forge (selective builder community); participated in Nexify'26 Hackathon representing PSIT as backend developer (Python/FastAPI).

TECHNICAL SKILLS

Languages: Python, C, C++, C#, JavaScript, Java
Web & Frontend: HTML, CSS, React.js (Vite), Node.js, Express.js, Tailwind CSS
Backend & APIs: FastAPI, Flask, Django, REST APIs, Uvicorn
Databases: PostgreSQL (Supabase), MySQL, MongoDB
AI / ML: LLM Integration (Groq API, llama-3.3-70b), Prompt Engineering
IoT / Embedded: ESP32, Sensor Integration, GPS, Real-time Dashboards
Tools: Git, GitHub, Postman, Docker, Kubernetes
